CHA GANGNAM MEDICAL CENTER

CHA UNIVERSITY
GANGNAM MEDICAL CENTER

About

CHA Gangnam Medical Center, CHA University

CHA Medical Group started as the CHA Gangnam OB-GYN Clinic in 1960. It has since continued to grow and now plays a significant role in providing quality medical services including OB-GYN, fertility, internal medicine, general surgery, pediatrics and more.

In 1986, Cha Medical Group became the first in Korea to succeed at IVF procedure and in the same year, it became the first in the world to accomplish the gamete intra fallopian transfer (GIFT). In 1998, it became the first to develop the vitrified egg freezing method and standard technology for egg freezing, leading the global fertile reproductive medicine in clinical and technical fields.

Based on its 60 years of experience in the field of reproductive medicine, CHA GANGNAM MEDICAL CENTER is a leading expert in providing safe and effective reproductive medical care services, ranging from infertility treatment to delivery.
